## EDUCATION

### ORDINARY NATIONAL DIPLOMA - OND, COMPUTER SCIENCE

Federal polytechnic Ilaro Ogun State

Distinction

2022 - 2024

## SKILLS

- PHP
- Laravel
- backend development
- database design
- Rest Api

## Hobbies

Sci-Fi Movies

Tech Contents

## SUMMARY

I am James Daniel, a backend developer from Lagos, Nigeria, with a strong focus on writing clean and efficient code. I specialize in backend technologies like PHP (Laravel), and MySQL, and I have a passion for building scalable web applications and APIs. I take pride in writing maintainable and well-structured code while ensuring performance and scalability. I work well in team environments.

## EXPERIENCE

### BACKEND DEVELOPER

Zealarax Technologies

#### Nov 2024 - Present

In my current role as a Backend Development Intern at Zealarax Technologies, I am responsible for building and maintaining scalable APIs to support various applications. I work with PHP, Laravel, and MySQL to develop backend services and ensure smooth integration with the frontend. My role also involves testing and debugging code to optimize the performance of the applications. I collaborate closely with a team of developers,

learning to implement best practices in clean code, system design, and efficient database management. Working in a team environment, I contribute to the development of robust solutions, continuously improving my skills and understanding of modern web technologies and API development.

### **WEB DEVELOPER TRAINEE**

Kudastech

**Nov 2023 - Nov 2024**

During my time at Kudastech, I gained extensive knowledge in web development, mastering both frontend and backend technologies. I started with the fundamentals of HTML, CSS, and JavaScript, then progressed to using Bootstrap for responsive design. On the backend, I honed my skills in PHP and MySQL, while also working with Laravel and Livewire to build robust, scalable web applications. I learned how to integrate these applications with databases and ensure their smooth functionality through modern development practices. This hands-on experience has equipped me with a solid foundation in full-stack development, enabling me to create dynamic applications and collaborate effectively within a team environment.
